Contents

1 Overview **1**

1.1 Design Intent 1

2 Analysis **2**

2.1 Narrative Text 2

2.2 Enumerated Items 2

3 Summary **3**

1 Overview

This design example uses the compact submission title page. It demonstrates a lighter front page followed by a complete but short thesis-like document.

1.1 Design Intent

The submission layout emphasizes essential metadata and leaves institutional branding more restrained than the classic cover.

2 Analysis

2.1 Narrative Text

A paragraph of sample text is useful for checking margins, line spacing, and font sizes across the body pages. The template should remain readable for both short and long documents.

2.2 Enumerated Items

1. Prepare the metadata.
2. Select a title-page variant.
3. Add the thesis content.
4. Compile twice for stable references.

3 Summary

The minimal submission example provides a second full-document preview with a different cover setting.
